

## CS 1344: Collaboration Request Form

For project 3, you are allowed to choose a project partner from CS1344 and work together. You may choose to work alone but you will not be given any extra credit for that. If you choose to work with a partner, this form must be signed by you and your project partner. For electronic submissions, you are allowed to use only one grader account. You and your project partner will receive the same grade irrespective of individual contributions. Once you sign up with someone for a project, you have to stick with that person.
