

Networked Computer Science Technical Reports Library

NCSTRL (pronounced "ancestral") is an international collection of computer science technical reports from CS departments and industrial and government research laboratories, made available for non-commercial and educational use. The NCSTRL collection is distributed among a set of interoperating servers operated by participating institutions. Read the official NCSTRL press package for a description of the background, goals, and organization of NCSTRL.

Search the NCSTRL collection

- The **Fielded Search Form** allows you to perform a search on several fields of the bibliographic data, and/or to limit the search to specific institutions,
- Or simply enter one or several words into the box below to search author, title, and abstract:

- Or browse reports at any of the participating institutions.

I want to join NCSTRL, tell me more

Read the faq for institutions interested in participating in the NCSTRL

collection.
