

Three image qualities:  
*Good*~~*Better*~~, and *Best*

The DC50 supports standard  
PCMCIA/ATA cards

*You can either view the images on the camera or download them directTy*

## RESIZE IMAGES

After you capture, download, and save an image with the DC50 zoom camera, you can use the image in a variety of applications.

## adding images to documents

We'll use MICROSOFT WORD software for this example, but any word processing software will do.

To add an image to a WORD document, open a Word document file and select "Frame" from the Insert menu. Position the frame, then select "Picture" from the Insert menu.

Navigate to the image you want added and select "Insert." The image

is automatically added!

## adding images to presentations

We'll use ADOBE PERSUASION software for this example, but any presentation software package will do.

**HINT:** Make sure your file is in Slide View

To add an image to a PERSUASION presentation, open a presentation file and select "Import" from the File menu. Navigate to the image you want
